Alternate colors available on pickup sets and hardware; custom pickup sets are also available.

DIMARZIO® PICKUP COLORS AND OPTIONS

HUMBUCKER COLORS

DiMarzio® full-sized humbuckers come standard in black but are also available in cream or in black & cream at no additional charge. Many humbuckers are also available in custom colors such as blue, green, pink, red, purple, white, yellow or combinations of these colors at a \$10 higher List Price, or in Camouflage at a \$30 higher List Price. See website for available colors on all models. Most humbuckers are available with chrome, black or gold polepieces. See website picture for standard color. Alternate polepiece colors when available are at a \$10 higher List Price except humbuckers with gold bar polepieces are \$20 higher. All full-size uncovered humbuckers come in matte finish except PAF®-style humbuckers when ordered with vintage glossy bobbins.

OPTIONS ON HUMBUCKERS

DiMarzio® 12-pole humbuckers are available with a metal cover in polished nickel, buffed unplated nickel-silver or matte black for an additional charge of \$23 List, and polished gold or vintage worn nickel for an additional \$33 List. PAF®-style humbuckers (6 slotted polepieces, 6 solid polepieces) are available with vintage options: long-legged nickel-silver base in standard spacing for an additional charge of \$10 List; vintage glossy bobbins in standard spacing in black, double cream or black & cream for an additional charge of \$10 List; vintage one-conductor cable for an additional charge of \$5 List. Metal covers are not available on models with bar polepieces.

CHROME TOP™ HUMBUCKERS

DiMarzio® humbuckers with 12 polepieces are available with Chrome Tops™, a veneer of solid metal bonded to the tops of the coils, hand polished to a mirror finish and heavily plated to the same standards as fine jewelry. The solid metal surface is as tough and durable as a traditional metal pickup cover but gives you the modern look of uncovered pickups. Add \$75 to List Price for Chrome Tops™. Also available in Gold Tops™. NOTE: Chrome Tops™ and Gold Tops™ are not available on X2N®, D Activator-X™ or D Sonic™ models or on 7-string humbuckers or on any single-coil pickup.

F-SPACING

F-spacing refers to a wider spacing between polepieces for improved alignment with the strings on most guitars with tremolos as well as many newer fixed-bridge instruments. All DiMarzio® full-sized humbuckers are available in standard spacing or F-spacing. For proper string alignment, F-spaced humbuckers should be used in the neck and bridge position when the distance between the high and low E strings measures 2 inches (51 mm) or greater over the pickup. Please specify "F-spaced" at the time you place your order. The X2N® and D Activator-X™ come in one spacing for all guitars.

COLORS ON OTHER MODELS

Unless otherwise noted, the standard color for all pickups is black except for Strat® replacement pickups which are white. Some Strat® replacement models are available in optional colors such as black, cream, aged white, mint green, blue, green, pink, red, purple or yellow at no additional charge, or in Camouflage at a \$20 higher List Price. See website for available colors on each model.

POLARITY

Our true single-coils, Virtual Vintage®, Area™ and DiMarzio® Soapbar™ models are available in reverse polarity at no additional charge. Please specify this option if desired when placing your order.

STRAT REPLACEMENTS WITH NO FLANGE, NO STAGGER or LEFT HANDED

All models for Strat® replacement are available on special order without a "flange" – the triangle-shaped extension on the pickup base – or with no magnet stagger at a \$10 higher List Price. Left-handed magnet stagger is available at no extra charge.
